

# Applied IT Services

## Making **IT** work for you

OUR GOAL IS TO MAKE YOUR BUSINESS SUCCESSFUL. WE WILL WORK HARD TO EARN YOUR TRUST. YOU CAN EXPECT US TO ACT WITH INTEGRITY AND IN YOUR BEST INTEREST.

Providing a full range of IT services including information system architecture review, business process improvement, project management, disaster preparedness, business continuity planning, information security, IT governance, policy and procedures, IT systems and technology management (upgrades, additions, and replacement), and problem solving and remediation.

## robust solutions for your business needs

### ENTERPRISE APPLICATION MANAGEMENT

Information technology changes at a rapid pace and you have a business to run. Let the professionals at Applied IT Services help you maintain your edge by working through the details to establish a reliable and sustainable information system solution that meets the needs of your particular business.

### ENTERPRISE STRATEGY

Developing the right application architecture and selecting and installing the software systems that best suit your business model and business size are key to managing costs and achieving the efficiency and productivity you require. We can help you architect, select, source and integrate key systems or help you get the most from the systems you already have.
