

# Research and Development Tax Credit Services

*We deliver objectives*

**M**any business executives are not aware that the government has enacted tax changes that help them recover cash based on day to day activities.

In 2001, as an economic investment incentive, the Federal Government expanded the R&D Tax Credit laws allowing businesses an opportunity to recoup a portion of their business expenses for activities related to business and product improvement.

## Who We Are

Beason & Nalley, Inc. in partnership with Axiom Solutions, has developed a valuable set of Tax Credit Services to businesses deserving R&D Tax Credits.

Our service applies business process engineering and R&D Tax accounting expertise to identify, quantify and substantiate activities that qualify for Federal and State Tax Credits.

Beason & Nalley's approach to R&D is unique because our professionals have the knowledge that equips us to analyze all types of manufacturing processes.

Targeting manufacturing companies, we leverage our experience to maximize the R&D Tax Credit in a way that is fully compliant with the current tax regulations.

## How it Works

Our proven approach makes the process of recovering your R&D Credit dollars efficient and risk-free. We work closely with your team to identify qualifying activities in a non-obtrusive yet comprehensive method. We perform the calculations and create the supporting documentation to insure the proper filing of the returns. Above all, we

insure that your project will be managed with the highest integrity.

If your business is improving its products or processes to compete in today's marketplace, chances are good that you qualify for tax credits. Please take advantage of the opportunity to discuss how your company can benefit from this valuable service.

## Activities That Qualify

- Developing new, improved or more reliable products / formulas
- Developing or improving production or manufacturing processes
- Developing prototypes or models
- Technical feasibility analysis
- Reliability testing
